PROFILE

I am an experienced Project Manager with a diverse background in both environmental management and construction. I began my career in environmental management, holding a Master's degree in Environmental Management and successfully managing projects for various companies. My expertise includes coordinating field work, installing monitoring systems, and implementing groundwater remediation measures to ensure compliance with environmental regulations. Additionally, I have extensive experience in the construction industry, where I have managed projects for multinational corporations, overseeing engineering planning, project delivery, and MEP installation works. I have successfully directed the construction of residential and commercial complexes, ensuring adherence to quality standards and timely completion. With my combined experience in environmental and construction sectors, I bring a comprehensive skill set and a holistic approach to project management, delivering successful outcomes in diverse industries.

WORK EXPERIENCE

Director of Operations

2021-Present

ObyD Group

- Developing and implementing operational strategies to optimize efficiency and productivity across the organization.
- Overseeing and coordinating day-to-day operations, ensuring seamless execution of business processes.
- Managing and monitoring key performance indicators (KPIs) to assess operational performance and identify areas for improvement.
- Streamlining and standardizing operational procedures and workflows to enhance productivity and reduce costs.
- Collaborating with cross-functional teams to align operational goals with overall business objectives.
- Implementing quality control measures to maintain high standards of service delivery and customer satisfaction.
- Identifying and mitigate operational risks and develop contingency plans to ensure business continuity.
- Conducting regular reviews and assessments of operational processes to identify opportunities for process optimization and automation.

Managing Partner/Project Manager

Itatech

2010-Present

- Served as the Client Service Manager (CSM) for all Oil & Gas activities in Sakhalin, representing Halliburton and ECC-VECO.
- Held the position of Project Director, overseeing all engineering and partial MEP installation works for an 18-story luxury residential apartment complex, Kandinsky House, located in Ekaterinburg, Russia.
- Acted as CSM for the expansion project in Gous Khrustalny, Russia, on behalf of Owens Corning.
- Led the role of Project Director for all engineering services related to a brownfield site in Orenburg, Russia, working in collaboration with John Deere.
- Managed client relationships and served as a key point of contact for all stakeholders involved in the Oil & Gas projects in Sakhalin, Russia.
- Coordinated with internal teams and external contractors to ensure efficient and effective project delivery for the expansion project in Gous Khrustalny.

GABRIO VALENTINO MARCHETTI

PROJECT MANAGER

EXPERTISE

- Diverse expertise in project management within the environmental and construction sectors, with a focus on client service.
- Proven success in managing projects for reputable companies, including Halliburton, ECC-VECO, Owens Corning, and John Deere.
- Strong track record of ensuring adherence to quality standards, project timelines, and budgetary constraints.
- Resilient and adaptable, capable of thriving in demanding and challenging conditions.
- Comprehensive knowledge of environmental regulations and construction industry standards.
- Excellent communication and collaboration skills, fostering strong relationships with stakeholders.
- Keen attention to detail and commitment to quality control.
- Strong problem-solving skills and proactive approach to addressing project challenges.
- Ability to navigate complex compliance requirements seamlessly.
- Consistently delivering successful project outcomes and exceeding client expectations.

Field Coordinator/Project Manager

CH2M Hill

2001-2009

- Developing comprehensive project plans, including defining project scope, objectives, deliverables, timelines, and resource requirements.
- Coordinating and leading project kickoff meetings to ensure alignment among stakeholders and team members.
- Monitoring project progress and tracking key milestones, ensuring adherence to project schedules and budgets.
- Identifying and mitigating project risks and issues, implementing appropriate contingency plans to minimize disruptions.
- Facilitating effective communication and collaboration among project team members, stakeholders, and clients.
- Managing project budgets, including tracking expenses, forecasting costs, and optimizing resource allocation.
- Conducting regular project status meetings, providing updates to key stakeholders and addressing any concerns or challenges.
- Ensuring project documentation is maintained and updated, including project plans, meeting minutes, and risk registers.
- Implementing project quality assurance measures, conducting regular reviews to ensure deliverables meet quality standards.
- Overseeing project closure activities, including finalizing project documentation, conducting post-project evaluations, and capturing lessons learned for future improvements.

Project Manager

CCT (Marcegaglia Group), Gallarate/Livorno (Italy)

1997-2001

- Assisted in the overall management of the projects, working closely with the Project Manager to ensure successful project execution.
- Participated in the planning and coordination of the construction activities for the skid-mounted glycol gas dehydration system, including the glycol regeneration chamber utilizing Coldfinger® technology.
- Coordinated with suppliers, contractors, and other stakeholders to ensure the timely delivery of materials and equipment required for the project.
- Supported the project team in monitoring project progress, tracking milestones, and ensuring adherence to project schedules and budgets.
- Assisted in overseeing the construction of the skid-mounted industrial wastewater treatment system for the Egyptian oil company, ensuring compliance with project specifications and industry standards.
- Collaborated with the project team to address any challenges or issues that arose during the construction process, implementing appropriate solutions to mitigate risks and ensure project success.

GABRIO VALENTINO MARCHETTI

PROJECT MANAGER

EXPERTISE

- Expertise in project management within the environmental and construction sectors.
- Extensive experience as a Client Service Manager for notable companies in the oil and gas industry.
- Proven track record in successfully managing the construction projects and overseeing engineering planning.
- Strong ability to coordinate cross-functional teams, collaborate with stakeholders, and mitigate risks for successful project outcomes.
- Demonstrated ability to work effectively in demanding and challenging conditions, showcasing resilience and adaptability in various project environments.
- Effective coordination and management of cross-functional teams, ensuring seamless project execution and collaboration.
- Proactive risk management, identifying potential issues early on and implementing mitigation strategies to minimize delays and ensure project success.

COURSES AND CERTIFICATION

- Part 107 certified remote pilot
- CH2M HILL Project Delivery Course in London, UK - November 2007
- CII (Construction Industry Institute) training in Denver Colorado - July 2007
- APT PAVIA, 16 hour fire fighting course; In possession of International Certificate – June 2003
- OSHA 24-Hour Hazardous Waste – November 2001
- OSHA Confined Space Entry - November 2001
- UNIVERSITY of PARMA, 1999 Course on human toxicology and eco-toxicology
- RBCA (Risk Based Corrective Action) ASTM in Ft. Lauderdale, Florida December 1998

Field Engineer

Ambiente S.p.A. –ENI Group

1996-1999

- Conducted on-site monitoring and remediation projects, ensuring compliance with environmental regulations and addressing contamination issues.
- Assisted in site management for emergency spills, coordinating response efforts and implementing containment measures.
- Coordinated and implemented sampling procedures, ensuring accurate data collection for environmental assessments.
- Served as a technical coordinator for environmental risk assessments, overseeing the assessment process for various projects.
- Developed risk assessment procedures and exposure scenarios, enhancing the accuracy of risk evaluation and management.
- Performed risk assessments for various facilities and sites, identifying potential risks and implementing mitigation measures.
- Installed and analyzed environmental systems, such as Soil Vapor Extraction (SVE), for contaminated sites.
- Coordinated field activities for chemical facilities, including the installation of monitoring systems.
- Provided technical expertise and guidance in environmental remediation projects, ensuring adherence to best practices and regulatory requirements.
- Collaborated with cross-functional teams and regulatory agencies to ensure successful project execution and environmental compliance.
